Report on business operations

Flossbach von Storch IV - Global Flexible Bond

The sub-fund Flossbach von Storch IV - Global Flexible Bond ended the financial year of 1 January 2024 to 31 December 2024 with an 1.09% increase in value. By comparison, REXP (the German bond index) gained 1.39% in value during the reporting period, while the Bloomberg Global Aggregate (total return, hedged in EUR) global index gained 1.69%.

The 2024 bond market was again challenging and characterised by high volatility, with significant differences between maturities and currency regions. By the end of the year, yields in large parts of the bond market were again significantly higher than at the beginning of the year. Looking back, three market phases stand out. The significant correction in the bond market in the first few months of the year in response to the continued resilience of the US economy and surprisingly strong US consumption. This was followed by a strong rally on the back of falling inflation data and a temporary weakening of the US labour market in the run-up to the first US interest rate cut in September. This was driven by a shift in the Fed's dual mandate away from price stability and towards supporting employment. From October, however, the US elections put renewed upward pressure on US yields in particular. Euro bonds, on the other hand, were largely able to decouple from the weakness in the US bond market in the final quarter of the year, reflecting the increasingly different fundamental situation in the euro area.

After interest rates had temporarily risen to between 5.25% and 5.50% (lower and upper bound of the federal funds rate) in the US and 4.0% (deposit rate) in the eurozone, the Fed cut its rates by one percentage point and the European Central Bank (ECB) by one and a quarter percentage point. At its December meeting, the Fed indicated only two rate cuts in 2025 (instead of the four it had in its September quarterly projections) and that it would take longer to reach "neutral" interest rates. Fed Chairman Jerome Powell repeatedly referred to the increased scenario uncertainty.

In the euro area, however, the picture was fundamentally different. It was increasingly characterised by growing concerns, particularly in the manufacturing sector in Germany, exacerbated by the prospect of possible tariffs from the new US administration. The inflationary trend in

the euro area (flat in the core rate and slightly higher in the headline rate in the fourth quarter) increasingly took a back seat in the euro bond market. The ECB responded by signalling further scope for rate cuts and by revising down its inflation and growth forecasts for 2025 and 2026

The prospect of further normalisation of monetary policy led to a further narrowing of credit spreads over the period. Looking at corporate bonds in the final quarter, it should be noted that the choice of reference for measuring risk premiums (German Bunds or euro swap rates) was crucial for categorising spread developments. This was due to the persistent and significant underperformance of Bunds relative to euro swaps, mainly driven by concerns about future net issuance of German government securities and a possible dilution of the debt brake.

During the financial year, the Fund used its flexibility in terms of interest rate management and allocation changes to adopt a counter-cyclical approach. Towards the end of the previous reporting period, a more tactically defensive duration approach was adopted. In the context of the slowdown in economic and inflationary data, the portfolio structure was slightly more offensive in July/early August and late August/early September in order to position the Fund to benefit from any price gains resulting from falling interest rates, particularly during these periods. In line with our active management style, we took advantage of the rise in yields in October and November to increase duration in an anti-cyclical (rising yields) manner. We began diversifying into Australian bonds at the end of October. We increased the proportion of corporate bonds in the portfolio in September, despite generally low spreads. This decision was based on the assumption that good quality corporate bonds could be the better alternative, especially in the US, where there was a risk of an oversupply of US government bonds.

The portfolio is broadly diversified and, as at 31 December 2024, is mainly invested in government, government-related and supranational bonds, all of which have a good credit rating. After successive increases, the duration reached its highest level of the period at the end of November. The allocation to corporate bonds is cautious at just over 30%, with little exposure to high yield, reflecting relative valuations.

Report on business operations (continued)

With a few selective exceptions, much of the corporate bond market offers yields close to the alternative opportunities of government bonds, government-related bonds and covered bonds. In our view, current interest payments continue to provide a solid basis for future fund performance. In addition, we see further potential for yields to fall from current levels, given the interest rate reduction cycles initiated by the Fed and the ECB and increasing growth risks. The portfolio's earnings power therefore gives us an optimistic outlook for the coming years.

Flossbach von Storch IV - Global Flexible

The sub-fund Flossbach von Storch IV - Global Flexible ended the financial year of 1 January 2024 to 31 December 2024 with a value increase of 12.24%.

2024 was a year of major political and geopolitical upheaval, especially in the last quarter of the year. In Europe, the governments in France and Germany fell. Donald Trump was re-elected President of the United States by a large majority.

Looking back over the year, it is fair to say that despite all the turbulence 2024 was a very good year for equities, although the central banks have cut interest rates far less than was widely expected a year ago. The robust US economy and the AI boom compensated for the weak economic performance in other regions of the world and helped US equities gain around 25% (S&P 500 incl. dividends) last year. The biggest beneficiaries were once again the heavyweights from the technology sector. The MSCI World Index, which is made up of more than 70% of US equities, also benefited from this and managed a gain of 26.6% (in euro terms), thanks in part to the strong US dollar. By comparison, the performance of European equities was more modest, with the STOXX Europe 600 rising by just under nine%, including dividends. The price of gold performed almost irritatingly well, reaching a record high of almost USD 2,800 per troy ounce in October. At the end of the year, it was still as high as USD 2,624, which meant an increase of 27% over the year, with the increase being achieved mainly in the first three quarters. In euro terms, the balance looks even better, with a gain of almost 36%, with the price in euro gaining more than 7% in the fourth quarter. Trump's re-election caused the yields of US Treasuries to rise significantly in view of the expected economic stimulus at the end of the year. In Germany and France, too, government bond yields rose in the fourth quarter. The annual balance for bond investors is also meagre. The noticeable rise in yields at the end of the year led to corresponding price losses for bonds still in circulation. Overall, bonds with good credit ratings yielded a modest 1.7% (Bloomberg Global Aggregate Index). For German Bunds, measured by the REXP index, the figure was only 1.1%.

At the end of the year, the equity weighting was 72.2%, up from 62.1% one year ago. The increase came from both broadly diversified additional purchases and the positive performance of existing investments.

Our gold allocation (not physical) changed slightly from 9.3 to 9.5%. Due to strong price gains over the whole year, we've been realizing profits in order not to violate the 10% upper limit. In principle, gold (not physical) is and remains a fixed component of the fund assets. In view of the ever-increasing and rapidly rising national debt worldwide, this applies even more.

The bond allocation fell during the reporting period – from 21.9 to 15.0% – due less to sales than to the maturing of some bonds. These mainly took the form of short-dated paper that could be regarded as cash substitutes. At the end of the year, the cash ratio was 4.6%, down from 6.7% the year before. It is therefore still sufficiently large to take advantage of investment opportunities as they arise, whether in equities or bonds.

Little has changed in relation to the regional distribution of the portfolio. Around half of our investments are in US dollars and around one third in euro. The fund had EUR 747 million in assets under management as of 31 December 2024. The five largest equity positions were Berkshire Hathaway, Deutsche Börse, Amazon, Apple and Fortive, which together accounted for around 16.8% of the fund assets.

Luxembourg, April 2025

Notes to the annual report as at 31 December 2024

1.) General information

The Flossbach von Storch IV fund (the "fund") is an openended investment fund and has been created on 29 September 2021 as a FCP (fonds commun de placement). The fund is governed by the provisions of the Part I of the Law of 17 December 2010, as amended, relating to Undertakings for Collective Investments. The management regulations were most recently amended on 1 November 2024 and notice of the lodging was published in Recueil électronique des sociétés et associations ("RESA").

The management company of the fund is Flossbach von Storch Invest S.A. (the "management company"), a public limited company under the law of the Grand Duchy of Luxembourg with its registered office at 2, rue Jean Monnet, L-2180 Luxembourg. It was incorporated for an indefinite period on 13 September 2012. Its articles of association were published on 5 October 2012 in Mémorial and were last amended on 15 November 2019 and published in RESA. The management company is registered in the Luxembourg Trade and Companies Register under registration number R.C.S. Luxembourg B 171513.

2.) Key accounting and valuation principles

This annual report has been prepared under the responsibility of the Executive Board of the management company in accordance with Luxembourg legal and regulatory requirements under the going concern basis of accounting.

- 1. The net assets of the fund are denominated in euros (EUR) (the "reference currency").
- 2. The value of a unit ("unit value") is denominated in the currency laid down in the annex to the sales prospectus ("sub-fund currency") unless a currency other than the sub-fund currency has been specified in the relevant annex to the sales prospectus in relation to any other unit classes which may exist ("unit class currency").
- The unit value is calculated by the management company or a third party commissioned for this purpose by the management company, under the supervision of the depositary, on each banking day

in Luxembourg with the exception of 24 and 31 December of each year ("valuation day") and rounded up to two decimal places. The management company may decide on a different arrangement for individual sub-funds, in which case it should be taken into account that the unit value should be calculated at least twice a month. However, the management company can decide to calculate the unit value on 24 and 31 December of a year without the calculation representing the unit value on a valuation day as defined by the previous sentence 1 of this clause 3. Consequently, investors cannot demand the issue, redemption and/or exchange of units on the basis of a unit value calculated on 24 December and/or 31 December.

- 4. The value is calculated on each valuation day based on the value of the assets of the respective sub-fund minus the liabilities of the respective sub-fund ("sub-fund's net assets") and divided by the number of units in circulation on the valuation day.
- 5. The respective sub-fund's net assets are calculated in accordance with the following principles:
- a) Securities, money market instruments, derivative financial instruments (derivatives) and other assets officially listed on a stock exchange are valued at the most recently available closing price that provides a reliable valuation. This does not apply to securities, money market instruments and/or derivatives domiciled in Asia or Oceania. These will be valued on the basis of the last known price at the time of valuation on the valuation day. If securities, money market instruments, derivative financial instruments (derivatives) and other assets are officially listed on more than one stock exchange, the stock exchange with the highest liquidity will be the definitive one.
- b) Securities, money market instruments, derivative financial instruments (derivatives) and other assets that are not officially listed on a securities exchange (or whose market price is not deemed representative, e.g. due to lack of liquidity) but that are traded on a regulated market shall be valued at a price that is not lower than the bid price and not higher than the offer price on the

Notes to the annual report as at 31 December 2024 (continued)

trading day preceding the valuation day and that the Management Company considers, to the best of its knowledge, to be the best possible price at which the securities, money market instruments. derivative financial instruments (derivatives) and other assets can be sold. The Management Company may specify for individual sub-funds that securities, money market instruments, derivative financial instruments (derivatives) and other assets that are not officially listed on a securities exchange (or whose market price is not deemed representative, e.g. due to lack of liquidity) but that are traded on a regulated market shall be valued at the last price available on this market that the Management Company considers, to the best of its knowledge, to be the best possible price which the securities, money market instruments, derivative financial instruments (derivatives) and other investments can be sold. Details on this are contained in the annex to the sub-fund in question.

- OTC derivatives are valued on a daily basis on a verifiable basis determined by the management company.
- d) Units in UCI/UCITS are generally valued at the last redemption price fixed before the valuation day or at the latest available price that affords a reliable valuation. If the redemption of investment fund units has been suspended or if no redemption price has been set, these units and all other assets are valued at their appropriate market values as determined in good faith by the management company in line with generally accepted and verifiable valuation rules.
- e) If the respective prices are not market prices, if the financial instruments listed under b) are not traded on a regulated market and if no prices are set for financial instruments other than those listed under a) and b), these financial instruments and the other legally permissible assets will be valued at the market value established in good

- faith by the management company on the basis of generally accepted, verifiable valuation rules (e.g. suitable valuation models taking account of current market conditions).
- f) The liquid funds are valued at nominal value plus interest.
- g) Amounts due, for example, deferred interest claims and liabilities, shall in principle be reported at their nominal value.
- h) The market value of securities, money market instruments, derivative financial instruments (derivatives) and other assets which are denominated in a currency other than that of the relevant sub-fund shall be translated into the currency of the sub-fund at the exchange rate determined using the WM/Reuters fixing at 5:00 pm CET/CEST on the trading day preceding the valuation day. Gains and losses on currency transactions shall be added or deducted as appropriate.

The management company can stipulate for individual sub-funds that the market value of securities, money market instruments, derivatives and other assets denominated in a currency other than the relevant sub-fund currency will be converted into the relevant sub-fund currency at the exchange rate prevailing on the valuation day. Gains and losses on currency transactions shall be added or deducted as appropriate. Details on this are contained in the sales prospectus in the annex to the sub-fund in question.

The respective sub-fund's net assets are reduced by any distributions paid, where applicable, to investors in the sub-fund concerned.

6. The fund is obliged to provide collateral - in connection with the conclusion of exchange traded derivatives as well as OTC-traded derivatives - to cover risks in the form of bank deposits or securities. The collateral provided in the form of bank deposits is as follows:

Sub-fund name	Counterparty	Initial margin	Variation margin	OTC variation margin
Flossbach von Storch IV - Global Flexible Bond	J.P. Morgan SE	EUR 0.00	EUR 0.00	EUR 980,000.00

No collateral was provided in the form of securities.

- 7. The unit value is calculated separately for each sub-fund according to the criteria listed above. However, if there are different unit classes within a sub-fund, the calculation of the unit value will be carried out separately for each unit class within
- this sub-fund pursuant to the criteria contained herein. The composition and allocation of assets always occurs separately for each sub-fund.
- 8. Costs incurred to establish the fund and the initial issue of units will be amortised over the first five financial years to the detriment of the assets in the

Notes to the annual report as at 31 December 2024 (continued)

sub-funds that existed on establishment. The formation expenses and the above- mentioned costs, which do not relate solely to the assets of a specific sub-fund, are split between the relevant sub-fund assets on a pro rata basis by the management company. Expenses which are incurred in connection with the launch of other sub-funds are charged to the relevant sub-fund assets to which they are attributable and depreciated within a period of a maximum of five years after the sub-funds have been launched.

For arithmetical reasons, the tables included in this report may contain rounding differences of up to plus or minus one unit (of currency, per cent, etc.).

3.) Taxation

Taxation of the fund

From a Luxembourg tax perspective, the fund has no legal personality as an investment fund and is tax transparent.

The fund is not subject to tax on income or profits from its assets in the Grand Duchy of Luxembourg. The assets of the fund are only subject to the so-called "taxe d'abonnement" in the Grand Duchy of Luxembourg, at a current rate of 0.05% p.a. A reduced "taxe d'abonnement" of 0.01% p.a. is applicable to (i) sub-funds or unit classes whose units are only issued to institutional investors within the meaning of Article 174 of the Law of 17 December 2010, (ii) sub-funds whose only purpose is investing in money market instruments, in term money at financial institutions, or both. The "taxe d'abonnement" is payable quarterly on the sub-fund's net assets reported at the end of each quarter. The amount of the "taxe d'abonnement" is specified for each sub-fund or unit class in the sub-fund specific annex of the sales prospectus. An exemption from the "taxe d'abonnement" applies to fund assets that are invested in other Luxembourg investment funds that are themselves already subject to the "taxe d'abonnement".

Income received by the fund (in particular interest and dividends) could be subject to withholding tax or investment tax in the countries where the fund assets are invested. The fund could also be subject to tax on realised or unrealised capital gains on its investments in the source country. Fund distributions, liquidation gains and disposal gains are not

subject to withholding tax in the Grand Duchy of Luxembourg. Neither the depositary nor the management company is obliged to obtain tax certificates.

Investors and potential investors are advised to inform themselves about the laws and regulations that apply to taxation of the fund assets and the subscription, purchase, possession, redemption, exchange and transfer of units and to seek advice from outside third parties, in particular from a tax advisor.

Taxation of earnings from units in the fund held by the investor

Investors that are or were not resident for tax purposes in the Grand Duchy of Luxembourg and do not maintain a business establishment or have a permanent representative in the Grand Duchy of Luxembourg are not subject to Luxembourg income tax on income or disposal gains from their units in the fund.

Natural persons who are resident for tax purposes in the Grand Duchy of Luxembourg are subject to the progressive Luxembourg income tax.

Investors and potential investors are advised to inform themselves about the laws and regulations that apply to taxation of the fund assets and the subscription, purchase, possession, redemption, exchange and transfer of units and to seek advice from outside third parties, in particular from a tax advisor.

4.) Use of income

The management company may distribute the income generated by the fund to investors or reinvest such income in the fund. Information about this can be found in the relevant annex to the sales prospectus for the individual sub-fund.

Income is utilised in accordance with Article 12 of the management regulations. The timing, amount and composition of the distributions are determined by the management company in the interests of the investors.

5.) Information on fees and expenses

The Fund Manager receives a performance fee from the net assets of the sub-fund Flossbach von Storch IV - Global Flexible in the amount of 10 per cent of the gross unit value performance if the gross unit value at the end of an accounting period exceeds the unit value at the end of the preceding accounting periods of the last 5 years ("high-water mark principle"), but not totalling more than 2.5 per cent of the average net asset value of the sub-fund in the accounting period of the relevant unit class. On each valuation day an accrual is made, when appropriate, and the final performance fee is payable annually. The performance fee is described in more detail in the Annex of the sales prospectus for the respective sub-fund.

Notes to the annual report as at 31 December 2024 (continued)

Flossbach von Storch IV - Global Flexible

As at reporting period-end, the following provision for performance fee is recorded:

Unit class	Performance fee (EUR)	% share ¹⁾
ВТ	8,479,764.52	1.13

¹⁾ The figures relate to the unit class net asset value.

6.) Transaction costs

Transaction costs include all expenses that are separately reported or charged for the account of the fund during the financial year and are directly connected with the purchase or sale of securities, money market instruments, derivatives or other assets. These costs primarily include commissions, settlement fees, depositary fees and taxes.

7.) Current accounts (bank deposits or liabilities to banks) of the sub-funds

All current accounts of a sub-fund (including those in different currencies) that are actually and legally only part of a single current account are shown as a single current account in the composition of sub-fund's net assets. Any foreign currency current accounts are converted to the currency of the relevant sub-fund. Interest is calculated based on the terms and conditions of each individual account.

8.) Events during the reporting period

With effect from 1 November 2024, the functions of the registrar and transfer agent as well as partial functions of the central administration were transferred from DZ PRIVATBANK S.A. to BNP PARIBAS, Succursale de Luxembourg.

At the same time, the depositary and paying agent functions were transferred from DZ PRIVATBANK S.A. to BNP PARIBAS, Succursale de Luxembourg. In the course of the change of service providers, the following changes were also made, which were taken into account in the sales prospectus dated 1 November 2024:

- Amendments to the fee structure: A central administration agent fee was introduced for the fund, which is charged instead of individual service provider costs and will cover various services. Further information on costs can be found in the currently valid sales prospectus.
- Amendments to the valuation: Securities, money market instruments, derivative financial instruments (derivatives) and other investments domiciled in Asia

or Oceania will be valued on the basis of the last known price at the time of valuation on the valuation day.

No other significant changes or other events occurred during the reporting period.

9.) Events after the reporting period

There were no significant changes or significant events after the end of the reporting period.

10.) Changes in the composition of the portfolio

A detailed statement including all purchases and sales during the reference period may be obtained free of charge upon request for each sub-fund from the registered office of the Management Company of the fund.

11.) Sustainability-related disclosure requirements

The sub-funds of Flossbach von Storch IV are classified as Article 8 products within the meaning of Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November, 2019 on sustainability-related disclosure requirements in the financial services sector ("SFDR", "Disclosure Regulation"). The information on the environmental and social characteristics promoted by the sub-funds is included in the annex to this annual report.

Audit report

To the Unitholders of Flossbach von Storch IV

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Flossbach von Storch IV (the "Fund") and of each of its sub-funds as at 31 December 2024, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the combined composition of fund's net assets for the Fund and the composition of the sub-fund's net assets for each of the sub-funds as at 31 December 2024;
- the statement of changes in fund's net assets for the Fund and the statement of changes in subfund's net assets for each of the sub-funds for the year then ended;
- the statement of income and expenses for the Fund and the statement of income and expenses for each of the sub-funds for the year then ended;
- the statement of investments for each of the sub-funds as at 31 December 2024; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Management Company is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Management Company for the financial statements

The Board of Directors of the Management Company is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Management Company determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Management Company is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Management Company either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control;

- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Management Company;
- conclude on the appropriateness of the Board of Directors of the Management Company's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events
 in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Other information (unaudited)

1.) Information on the remuneration policy

The Flossbach von Storch Group has established an appropriate remuneration system for all employees that takes into account relevant functions and is consistent with the Flossbach von Storch Group business and risk strategy and objectives and values as well as the company's long-term interests and measures in relation to handling conflicts of interest. The policy surrounding remuneration is adapted to the companies' risk profile and incorporates sustainability risks, i.e. events or conditions relating to the environment, social affairs or corporate governance that could have a negative impact on the company's financial situation or profits, or on the reputation of Flossbach von Storch. It takes into account the long-term and sustainable performance of the Flossbach von Storch Group as well as the interests of the company's employees, customers, investors and owners, and is thus designed to avoid conflicts of interest.

An employee's total remuneration may be composed of both a fixed and a variable component.

Fixed remuneration is defined as the contractually agreed fixed salary, usually paid monthly, as well any financial benefits or benefits in kind within the meaning of the law that are based on a previously established, general, permanent and non-discretionary Flossbach von Storch regulation. Variable remuneration is granted by Flossbach von Storch as a performance-related bonus in return for an employee's sustained and risk-adjusted performance based on an assessment of the individual performance, the performance of the division or business unit in question and the overall financial performance of Flossbach von Storch; payment of variable remuneration and the amount thereof will be based on merit and be at the discretion of Flossbach von Storch. Qualitative and quantitative criteria should be taken into account in the determination of variable remuneration.

The variable and fixed remuneration must be appropriately balanced, with a view to avoiding excessive risk assumption. The annual review of the remuneration policy did not result in any significant changes.

Details regarding the Flossbach von Storch Group's remuneration policy, including a description of how the remuneration and the other benefits are calculated, and

the responsibilities for allocating the remuneration and other benefits, are available free of charge on the Management Company's website at www.fvsinvest.lu.

The number of remunerated employees at the end of the management company's year 2023 was 41 (excluding members of the supervisory board). The total remuneration of these employees in relation to the present fund was approx. EUR 74k (excluding social security contributions). Of this, approx. 72% was attributable to fixed remuneration components, of which EUR 28k was attributable to risk takers. The proportion of variable remuneration components to staff costs on the whole was approx. 28%, of which EUR 17k was attributable to risk takers.

Of a total of 41 employees (excluding members of the supervisory board), 35 employees received a variable remuneration.

Management of the fund's portfolio was outsourced to Flossbach von Storch SE with its registered office in Cologne (Germany).

In the 2023 financial year, the total Flossbach von Storch SE staff costs (excluding social security contributions and occupational pensions) in relation to the present fund came to EUR 712k. Of this, approx. 72% was attributable to fixed remuneration components. The proportion of variable remuneration components to staff costs on the whole was approx. 28%.

In the year 2023, 298 employees out of a total of 324 (excluding members of the supervisory board) received a variable remuneration.

2.) Transparency of securities financing transactions and their reuse

No securities financing transactions or total return swaps as defined in this regulation were used during the reporting period of the fund. Consequently, none of the disclosures specified in Article 13 of of Regulation (EU) 2015/2365 of the European Parliament and of the Council of 25 November 2015 on transparency of securities financing transactions and of reuse and amending Regulation (EU) No 648/2012 need to be provided.

Detailed information on the fund's investment strategy and the financial instruments used is available in the current sales prospectus. Other information (unaudited) (continued)

3.) Risk management

The management company employs a risk management procedure enabling it to monitor and assess the risk connected with investment holdings as well as their share in the total risk profile of the investment portfolio of the funds it manages at any time. In accordance with the Law of 17 December 2010 and the applicable supervisory requirements of the Commission de Surveillance du Secteur Financier ("CSSF"), the management company reports regularly to the CSSF about the risk management procedures used. Within the framework of the risk management procedure and using the necessary and appropriate methods, the management company ensures that the overall risk of the managed funds associated with derivatives does not exceed the total net value of their portfolios. According to the sales prospectus applicable at the end of the financial year, the following risk management procedures are used for the individual sub-funds:

Commitment approach:

With the commitment approach, the positions from derivative financial instruments are converted into their corresponding (delta-weighted, where applicable) underlying equivalents or nominal values. In doing so, the netting and hedging effects between derivative financial instruments and their underlyings are taken into account. The total of

these underlying equivalents may not exceed the total net value of the fund's portfolio.

Value-at-risk (VaR) approach:

The VaR figure is a mathematical, statistical concept and is used as a standard risk measure in the financial sector. The VaR indicates the potential loss of a portfolio which, with a certain probability (the confidence level), will not be exceeded during a certain period (the holding period).

Absolute VaR approach:

In the absolute "VaR approach", the VaR (99% confidence level, 20-day holding period) of the fund may not exceed a share of the fund assets that depends on the risk profile level of the fund. The maximum limit permitted by supervisory regulations is 20% of the fund assets.

For funds whose total risk associated with derivatives is determined using VaR approach, the management company estimates the anticipated degree of leverage. Depending on the respective market situation, this degree of leverage may deviate from the actual value and may either exceed or be less than that value. Investors should be aware that no conclusions about the risk

content of the fund may be drawn from this data. In addition, the published expected degree of leverage is explicitly not to be considered an investment limit.

Absolute VaR approach for the Flossbach von Storch IV - Global Flexible Bond sub-fund

The absolute VaR approach was used to monitor and measure the total risk associated with the use of derivatives during the period ended 31 December 2024. 10% was used as an internal upper limit. VaR utilisation during the applicable period was a minimum of 2.21%, a maximum of 4.57% and an average of 3.52% relative to this internal upper limit. The VaR was calculated using a (parametric) variance-covariance method variance-covariance method until 31 October 2024. From beginning of November 2024, a historical simulation was used to calculate the VaR. In both cases, the VaR was calculated with a 99% one -sided confidence interval, a holding period of 20 days and a (historical) observation period of 1 year (252 trading days).

Leverage for the Flossbach von Storch IV - Global Flexible Bond sub-fund

Leverage had the following values during the period ended 31 December 2024:

Minimum leverage:	49.98%
Maximum leverage:	84.20%
Average leverage (median):	67.88% (66.98%)
Calculation method:	Nominal value method

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?				
• • Yes	● ● No			
It made sustainable investments with an environmental objective:_% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective			
It made sustainable investments with a social objective: _%	It promoted E/S characteristics, but did not make any sustainable investments			

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In order to achieve the environmental and social characteristics promoted by the Flossbach von Storch IV - Global Flexible Bond, the following sustainability indicators were taken into account during the reporting period:

- 1) Exclusion criteria with social and environmental characteristics were implemented. These criteria included, for example, excluding investments in companies with certain business models. A list of the pertinent exclusion criteria can be found in the section "How did the sustainability indicators perform?".
- 2) An engagement policy was pursued to work towards positive development in the event of particularly severe negative impacts on certain sustainability factors. The engagement policy covered the following areas: greenhouse gas emissions and social/employee matters.

At the end of the reporting period, 98% of the sub-fund assets was allocated to investments with environmental or social characteristics.

How did the sustainability indicators perform?

Performance of the promoted environmental and social characteristics of the Floss-bach von Storch IV - Global Flexible Bond was as follows:

1) Applied exclusions:

Compliance with the applied exclusions was based on turnover thresholds that were implemented and met as follows during the reporting period. No investments were made in companies that generate

- > 0% of their turnover from the production and sale of controversial and unconventional weapons
- > 10% of their turnover from the production and sale of conventional weapons
- > 0% of their turnover from mining without simultaneously observing the UN Guiding Principles on Business and Human Rights (UNGP) and OECD Guidelines for Multinational Enterprises and without a policy to control and limit the environmental impacts of this line of business
- > 0% of their turnover from conventional oil and gas production, unless they simultaneously generate at least 20% of their turnover from the production of natural gas or from renewable energy sources
- > 10% of their turnover from coal production and unconventional oil and gas production
- > 10% of their turnover from the ownership or operation of gambling-related businesses
- > 0% of their turnover from the production of tobacco
- > 10% of their turnover from wholesale tobacco sales
- > 0% of their turnover from the production, manufacture and sale of palm oil
- > 0% of their turnover from the production, manufacture and sale of soy.

Companies active in electricity generation are excluded, if their use of fossil fuels for the production of electricity exceeds one of the thresholds below Coal > 5%

Oil and gas > 20%

In addition, an in-house review did not identify any investments in companies that have committed serious violations of the Principles of the UN Global Compact (UNGC) with no positive outlook. Furthermore, no investments were made in state issuers that are rated "not free" in the Freedom House Index.

2) Engagement policy in the event of particularly severe negative impacts: Greenhouse gas emissions:

In order to measure particularly severe negative impacts on certain sustainability factors relating to greenhouse gas emissions, in-house ESG analyses examined the following indicators and prioritised them by relevance, severity of potential negative impacts, approach to dealing with them and data availability: Greenhouse gas emissions (scope 1 and 2), greenhouse gas emission intensity and carbon footprint based on scope 1 and 2, as well as the consumption of non-renewable energy sources.

During the reporting period, no portfolio companies were identified by means of inhouse analysis as having particularly severe negative impacts on greenhouse gas emissions.

Proactive initiative to engage on climate targets: To promote the increasingly positive greenhouse gas performance of the portfolio companies, we have started to engage directly with companies that have not yet set climate targets and have presumably not yet implemented any systematic measures for reducing greenhouse gases. Although there is no evidence of particularly severe negative impacts in these instances, by actively engaging we hope to raise awareness of the importance of reducing greenhouse gas emissions and switching to renewable energies.

The analysis of all portfolio companies in respect of whether defined climate targets are consistent with the Paris Climate Agreement produced the following result as at 31 December 2024:

- 44 companies have set climate targets in line with the Paris Climate Agreement
- 0 companies have set climate targets that are not consistent with the Paris Climate Agreement or have committed to publishing climate targets soon

- 1 company have not set climate targets, nor have they committed to implementing any measures aimed at reducing greenhouse gas emissions

Social and employee matters:

To measure particularly severe negative impacts on certain sustainability factors relating to social/employee matters, in-house ESG analyses examined in detail the following indicators and prioritised them by relevance, severity of potential negative impacts, approach to dealing with them and data availability: Violations of the Principles of the UN Global Compact, violations of the OECD Guidelines for Multinational Enterprises and the measures and processes in place to comply with the Principles and Guidelines.

In the reporting period none of the investee companies was found to have committed any particularly serious violation of the above Principles or Guidelines.

Measures taken:

The measures taken during the reference period to meet environmental and social characteristics are presented in the section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

...and compared to previous periods?

1) Performance of applied exclusions criteria

Previous and current reporting period: The sub-fund complied with all applied exclusion criteria.

2) Adverse sustainability impacts considered

Greenhouse gas emissions

Previous two and current reporting period:

None of the portfolio companies showed any particularly severe impacts on **green-house gas emissions** within the proprietary analysis process.

Social and employee matters

Reporting period ending 31 December 2022:

One of the portfolio companies showed particularly severe impacts on social and employee matters within the proprietary analysis process.

Previous and current reporting period:

None of the portfolio companies showed any particularly severe impacts on **social and employee matters** within the proprietary analysis process.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. Flossbach von Storch IV - Global Flexible Bond did not make any sustainable investments.

Principal adverse impacts are the most significantly negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. Flossbach von Storch IV - Global Flexible Bond did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Flossbach von Storch IV - Global Flexible Bond considered the principal adverse impacts (PAIs or PAI indicators) of the investment decision on sustainability factors in accordance with Article 7(1)(a) of Regulation (EU) 2019/2088 (Disclosure Regulation), as well as an additional climate-related indicator ("Companies without carbon emission reduction initiatives") and two additional social indicators ("Lack of a human rights policy" and "Lack of anti-corruption and anti-bribery policies") in an in-house investment process with particular focus on certain PAI indicators. The focal PAIs in the investment strategy were as follows: Greenhouse gas emissions (scope 1 and 2), greenhouse gas emission intensity and carbon footprint based on scope 1 and 2, as well as the consumption of non-renewable energy sources. In addition, attention was paid to violations of the principles of the UN Global Compact, violations of the OECD Guidelines for Multinational Enterprises and the measures and processes in place to comply with the Principles and Guidelines. The consideration of PAIs also served to achieve the environmental and social characteristics promoted by Flossbach von Storch IV - Global Flexible Bond.

The identification, prioritisation and assessment of the PAIs was performed as part of the in-house analysis process using ESG analyses that were specifically prepared for the individual investee issuers/guarantors and taken into account in the risk-reward profile of the company analyses. The PAI indicators were prioritised according to relevance, severity of negative impacts, and data availability. The evaluation was not based on rigid bandwidths or thresholds that companies had to meet or achieve; rather, the focus was on whether there is a positive development in how they are managing the PAI indicators.

Primary data published by the portfolio companies was collected as part of the in-house analysis process for identifying the focal PAIs, e.g. as part of the sustainability report. This allowed the best possible examination of the data and data quality and assessment of the portfolio companies' handling of the factors considered. Due to insufficient quality and coverage of individual data points, Flossbach von Storch has used engagement activities to work towards improvement.

Applied engagement policy:

In the event of particularly severe negative impacts, the engagement policy attempts to work towards positive development by engaging with prioritised companies. Further details of the measures taken are presented in the section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

Applied exclusions:

Compliance with exclusions contributed to a reduction or avoidance of PAI indicator 10 "Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises", PAI indicator 14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)" and PAI indicator 4 "Exposure to companies active in the fossil fuel sector", e.g. (non-exhaustive list):

- the exclusion of coal production,
- the exclusion of companies with serious violations of the UNGC Principles (without positive outlook) and.
- the exclusion of controversial weapons.

The list includes the following investments constituting the greatest proportion of investments of the financial product during the reference period: 01 January 2024 - 31 December 2024

What were the top investments of this financial product?

The information presented provides an overview of the fifteen top investments of the subfund (top 15 positions).

All the main investments are presented in aggregated form. They are determined based on their respective security identification numbers (WKN/ISIN). To comply with regulatory provisions, the largest weightings are based on the average of four quarterly closing dates in the reference period. All values are shown in euro to facilitate comparison and analysis.

The table also provides information on the sector and the issuer's headquarters.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 98.08% as at 31 December 2024. Sustainability-related investments are those investments that are consistent with the environmental and social characteristics of Flossbach von Storch IV - Global Flexible Bond.

What was the asset allocation?

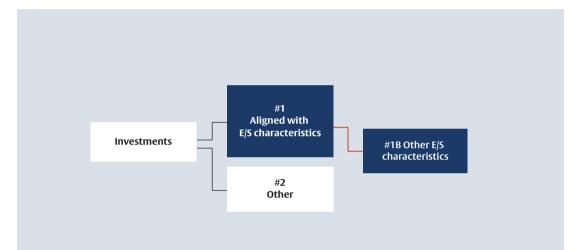

The asset allocation of Flossbach von Storch IV - Global Flexible Bond as at 31 December 2024 was as follows.

#1 Aligned with E/S characteristics:

98.08% were invested in securities and money market instruments that are subject to ongoing screening in respect of the aforementioned exclusion criteria and the principle adverse impacts on sustainability factors.

#2 Other:

The remaining investment portion (1.92%) related, for example, to liquid assets (esp. cash to service short-term payment obligations), und derivatives.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

Utilities	Utilities	1.66%
Materials	Materials	1.57%

0.00% of the sub-fund assets was invested in the fossil fuels sector.

Due to rounding differences in individual amounts, totals may differ from the actual value.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of: turnover reflecting the share of revenue from the green activities of investee companies capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

M

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Flossbach von Storch IV - Global Flexible Bond has promoted environmental and social characteristics, but has not sought to make any taxonomy-aligned investments. The investments did not contribute to achieving any of the environmental objectives specified in Article 9 of Regulation (EU) 2020/852 (EU Taxonomy). The share of environmentally sustainable investments made in accordance with the EU taxonomy was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹? Yes In fossil gas In nuclear energy No |X|The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments 2. What was the share of investments made in transitional and enabling activities?

Not applicable. Flossbach von Storch IV - Global Flexible Bond promotes E/S characteristics but is not striving to make sustainable investments. Accordingly, the share of investments in transitional and enabling activities was 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. Flossbach von Storch IV - Global Flexible Bond promotes E/S characteristics but is not striving to make sustainable investments.

Fossil gas and/or nuclear related activities only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. Flossbach von Storch IV - Global Flexible Bond promotes E/S characteristics but does not make sustainable investments.

What was the share of socially sustainable investments?

Not applicable. Flossbach von Storch IV - Global Flexible Bond promotes E/S characteristics but does not make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The following investments were classified as "#2 Other" as at 31 December 2024:

- Liquid assets, primarily in the form of cash, to service short-term payment obligations with no minimum environmental or social safeguards.
- Derivatives. No environmental or social minimum safeguards have been defined here.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following actions were taken to meet the environmental and/or social characteristics of Flossbach von Storch IV - Global Flexible Bond:

1) Applied exclusions:

The exclusion criteria listed in the section "How did the sustainability indicators perform?" were constantly reviewed and updated on the basis of internal and external ESG research data. Compliance with the exclusion criteria was monitored both before an investment was made and during the subsequent holding period.

2) Engagement policy in the event of particularly severe negative impacts:

Greenhouse gas emissions

During the reporting period, no portfolio companies were identified by means of in-house analysis as having particularly severe negative impacts on greenhouse gas emissions. Accordingly, there was no exposure with any reference to particularly severe negative impacts during the reporting period.

To drive improvements in respect of **greenhouse gas emissions**, the sub-fund actively engaged with 1 portfolio companies that have not yet set themselves any climate targets. As at 31 December 2024: The discussions are still ongoing, in the event the engagement with these companies could not be concluded.

Social and employee matters

During the reporting period, no portfolio companies were identified by means of in house analysis as having particularly severe negative impacts on social and employee matters. Accordingly, there was no exposure with any reference to particularly severe negative impacts during the reporting period.

Flossbach von Storch also reports on activities performed as an active owner in the annual Active Ownership report, which is published on the website together with sustainability-related disclosures.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable. Flossbach von Storch IV - Global Flexible Bond promotes E/S characteristics but does not designate an index as a reference benchmark.

Periodic disclosure for the financial products referred to in Article 8 (1), (2) and (2a) of Regulation (EU) 2019/2088 and Article 6 (1) of Regulation (EU) 2020/852

Product name: Flossbach von Storch IV - Global Flexible Legal entity identifier: 8945009X1VILLG74AB03

Sustainable investment

means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852 establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?		
• • Yes	● ● No	
It made sustainable investments with an environmental objective:_% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	
It made sustainable investments with a social objective: _%	with a social objective It promoted E/S characteristics, but did not make any sustainable investments	

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

In order to achieve the environmental and social characteristics promoted by the Flossbach von Storch IV - Global Flexible, the following sustainability indicators were taken into account during the reporting period:

- 1) Exclusion criteria with social and environmental characteristics were implemented. These criteria included, for example, excluding investments in companies with certain business models. A list of the pertinent exclusion criteria can be found in the section "How did the sustainability indicators perform?".
- 2) An engagement policy was pursued to work towards positive development in the event of particularly severe negative impacts on certain sustainability factors. The engagement policy covered the following areas: greenhouse gas emissions and social/employee matters.

At the end of the reporting period, 87% of the sub-fund assets was allocated to investments with environmental or social characteristics.

How did the sustainability indicators perform?

Performance of the promoted environmental and social characteristics of the Floss-bach von Storch IV - Global Flexible was as follows:

1) Applied exclusions:

Compliance with the applied exclusions was based on turnover thresholds that were implemented and met as follows during the reporting period. No investments were made in companies that generate

- > 0% of their turnover from the production and sale of controversial and unconventional weapons
- > 10% of their turnover from the production and sale of conventional weapons
- > 0% of their turnover from mining without simultaneously observing the UN Guiding Principles on Business and Human Rights (UNGP) and OECD Guidelines for Multinational Enterprises and without a policy to control and limit the environmental impacts of this line of business
- > 0% of their turnover from conventional oil and gas production, unless they simultaneously generate at least 20% of their turnover from the production of natural gas or from renewable energy sources
- > 10% of their turnover from coal production and unconventional oil and gas production
- > 10% of their turnover from the ownership or operation of gambling-related businesses
- > 0% of their turnover from the production of tobacco
- > 10% of their turnover from wholesale tobacco sales
- > 0% of their turnover from the production, manufacture and sale of palm oil
- > 0% of their turnover from the production, manufacture and sale of soy.

Companies active in electricity generation are excluded, if their use of fossil fuels for the production of electricity exceeds one of the thresholds below Coal > 5%

Oil and gas > 20%

In addition, an in-house review did not identify any investments in companies that have committed serious violations of the Principles of the UN Global Compact (UNGC) with no positive outlook. Furthermore, no investments were made in state issuers that are rated "not free" in the Freedom House Index.

2) Engagement policy in the event of particularly severe negative impacts: Greenhouse gas emissions:

In order to measure particularly severe negative impacts on certain sustainability factors relating to greenhouse gas emissions, in-house ESG analyses examined the following indicators and prioritised them by relevance, severity of potential negative impacts, approach to dealing with them and data availability: Greenhouse gas emissions (scope 1 and 2), greenhouse gas emission intensity and carbon footprint based on scope 1 and 2, as well as the consumption of non-renewable energy sources.

During the reporting period, no portfolio companies were identified by means of inhouse analysis as having particularly severe negative impacts on greenhouse gas emissions.

Proactive initiative to engage on climate targets: To promote the increasingly positive greenhouse gas performance of the portfolio companies, we have started to engage directly with companies that have not yet set climate targets and have presumably not yet implemented any systematic measures for reducing greenhouse gases. Although there is no evidence of particularly severe negative impacts in these instances, by actively engaging we hope to raise awareness of the importance of reducing greenhouse gas emissions and switching to renewable energies.

The analysis of all portfolio companies in respect of whether defined climate targets are consistent with the Paris Climate Agreement produced the following result as at 31 December 2024:

- 52 companies have set climate targets in line with the Paris Climate Agreement
- 2 companies have set climate targets that are not consistent with the Paris Climate Agreement or have committed to publishing climate targets soon

- 5 companies have not set climate targets, nor have they committed to implementing any measures aimed at reducing greenhouse gas emissions

Social and employee matters:

To measure particularly severe negative impacts on certain sustainability factors relating to social/employee matters, in-house ESG analyses examined in detail the following indicators and prioritised them by relevance, severity of potential negative impacts, approach to dealing with them and data availability: Violations of the Principles of the UN Global Compact, violations of the OECD Guidelines for Multinational Enterprises and the measures and processes in place to comply with the Principles and Guidelines.

In the reporting period none of the investee companies was found to have committed any particularly serious violation of the above Principles or Guidelines.

Measures taken:

The measures taken during the reference period to meet environmental and social characteristics are presented in the section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?"

...and compared to previous periods?

1) Performance of applied exclusions criteria

Previous and current reporting period: The sub-fund complied with all applied exclusion criteria.

2) Adverse sustainability impacts considered

Greenhouse gas emissions

Previous two and current reporting period:

None of the portfolio companies showed any particularly severe impacts on **green-house gas emissions** within the proprietary analysis process.

Social and employee matters

Reporting period ending 31 December 2022:

Two of the portfolio companies showed particularly severe impacts on social and employee matters within the proprietary analysis process.

Previous and current reporting period:

None of the portfolio companies showed any particularly severe impacts on **social and employee matters** within the proprietary analysis process.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable. Flossbach von Storch IV - Global Flexible did not make any sustainable investments.

Principal adverse impacts are the most significantly negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable. Flossbach von Storch IV - Global Flexible did not make any sustainable investments.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details: Not applicable.

The EU Taxonomy sets out a "do no significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Flossbach von Storch IV - Global Flexible considered the principal adverse impacts (PAIs or PAI indicators) of the investment decision on sustainability factors in accordance with Article 7(1)(a) of Regulation (EU) 2019/2088 (Disclosure Regulation), as well as an additional climate-related indicator ("Companies without carbon emission reduction initiatives") and two additional social indicators ("Lack of a human rights policy" and "Lack of anticorruption and anti-bribery policies") in an in-house investment process with particular focus on certain PAI indicators. The focal PAIs in the investment strategy were as follows: Greenhouse gas emissions (scope 1 and 2), greenhouse gas emission intensity and carbon footprint based on scope 1 and 2, as well as the consumption of non-renewable energy sources. In addition, attention was paid to violations of the principles of the UN Global Compact, violations of the OECD Guidelines for Multinational Enterprises and the measures and processes in place to comply with the Principles and Guidelines. The consideration of PAIs also served to achieve the environmental and social characteristics promoted by Flossbach von Storch IV - Global Flexible.

The identification, prioritisation and assessment of the PAIs was performed as part of the in-house analysis process using ESG analyses that were specifically prepared for the individual investee issuers/guarantors and taken into account in the risk-reward profile of the company analyses. The PAI indicators were prioritised according to relevance, severity of negative impacts, and data availability. The evaluation was not based on rigid bandwidths or thresholds that companies had to meet or achieve; rather, the focus was on whether there is a positive development in how they are managing the PAI indicators.

Primary data published by the portfolio companies was collected as part of the in-house analysis process for identifying the focal PAIs, e.g. as part of the sustainability report. This allowed the best possible examination of the data and data quality and assessment of the portfolio companies' handling of the factors considered. Due to insufficient quality and coverage of individual data points, Flossbach von Storch has used engagement activities to work towards improvement.

Applied engagement policy:

In the event of particularly severe negative impacts, the engagement policy attempts to work towards positive development by engaging with prioritised companies. Further details of the measures taken are presented in the section "What actions have been taken to meet the environmental and/or social characteristics during the reference period?".

Applied exclusions:

Compliance with exclusions contributed to a reduction or avoidance of PAI indicator 10 "Violations of UN Global Compact Principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises", PAI indicator 14 "Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons)" and PAI indicator 4 "Exposure to companies active in the fossil fuel sector", e.g. (non-exhaustive list):

- the exclusion of coal production,
- the exclusion of companies with serious violations of the UNGC Principles (without positive outlook) and,
- the exclusion of controversial weapons.

What were the top investments of this financial product?

The information presented provides an overview of the fifteen top investments of the subfund (top 15 positions).

All the main investments are presented in aggregated form. They are determined based on their respective security identification numbers (WKN/ISIN). To comply with regulatory provisions, the largest weightings are based on the average of four quarterly closing dates in the reference period. All values are shown in euro to facilitate comparison and analysis.

The table also provides information on the sector and the issuer's headquarters.

Largest investments	Sector	% of assets	Country
INVESCO PHYSICAL GOLD ETC	Gold	9.79%	United States of America

MICROSOFT CORP	Information Technology	1.97%	United States of America

The list includes the following investments constituting the greatest proportion of investments of the financial product during the reference period: 01 January 2024 – 31 December 2024

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The proportion of sustainability-related investments was 87.15% as at 31 December 2024. Sustainability-related investments are those investments that are consistent with the environmental and social characteristics of Flossbach von Storch IV - Global Flexible.

What was the asset allocation?

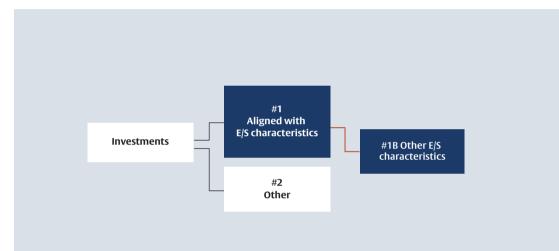

The asset allocation of Flossbach von Storch IV - Global Flexible as at 31 December 2024 was as follows.

#1 Aligned with E/S characteristics:

87.15% were invested in securities and money market instruments that are subject to ongoing screening in respect of the aforementioned exclusion criteria and the principle adverse impacts on sustainability factors.

#2 Other:

The remaining investment portion (12.85%) related, for example, to liquid assets (esp. cash to service short-term payment obligations), derivatives and, for further diversification, indirect investments in precious metals, solely gold certificates.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

• In which economic sectors were the investments made?

Communication Services	Telecommunication Services	0.36%
Materials	Materials	1.23%

0.00% of the sub-fund assets was invested in the fossil fuels sector.

Due to rounding differences in individual amounts, totals may differ from the actual value.

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of: turnover reflecting the share of revenue from the green activities of investee companies capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Flossbach von Storch IV - Global Flexible has promoted environmental and social characteristics, but has not sought to make any taxonomy-aligned investments. The investments did not contribute to achieving any of the environmental objectives specified in Article 9 of Regulation (EU) 2020/852 (EU Taxonomy). The share of environmentally sustainable investments made in accordance with the EU taxonomy was therefore 0%.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹? Yes In fossil gas In nuclear energy No |X|The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds. 1. Taxonomy-alignment of investments 2. Taxonomy-alignment of investments including sovereign bonds* excluding sovereign bonds* Turnover Turnover CapEx CapEx OpEx | OpEx | 0% 50% 100% 0% 20% 40% 60% 80% 100% Taxonomy-aligned: Fossil gas Taxonomy-aligned: Fossil gas Taxonomy-aligned: Nuclear Taxonomy-aligned: Nuclear Taxonomy-aligned (no gas and nuclear) Taxonomy-aligned (no gas and nuclear) Non Taxonomy-aligned Non Taxonomy-aligned This graph represents 100% of the total investments. * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

Not applicable. Flossbach von Storch IV - Global Flexible promotes E/S characteristics but is not striving to make sustainable investments. Accordingly, the share of investments in transitional and enabling activities was 0%.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable. Flossbach von Storch IV - Global Flexible promotes E/S characteristics but is not striving to make sustainable investments.

Fossil gas and/or nuclear related activities only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective – see explanatory note in the left-hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable. Flossbach von Storch IV - Global Flexible promotes E/S characteristics but does not make sustainable investments.

What was the share of socially sustainable investments?

Not applicable. Flossbach von Storch IV - Global Flexible promotes E/S characteristics but does not make sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The following investments were classified as "#2 Other" as at 31 December 2024:

- Liquid assets, primarily in the form of cash, to service short-term payment obligations with no minimum environmental or social safeguards.
- Derivatives. No environmental or social minimum safeguards have been defined here.
- Indirect investments in precious metals are currently made exclusively via gold certificates and have been used for further diversification. These are only sourced from partners who are committed to adhering to the London Bullion Market Association's (LBMA) Responsible Gold Guidance. This Guidance aims to prevent gold from contributing to systematic or widespread human rights abuses, conflict financing, money laundering or terrorist financing.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The following actions were taken to meet the environmental and/or social characteristics of Flossbach von Storch IV - Global Flexible:

1) Applied exclusions:

The exclusion criteria listed in the section "How did the sustainability indicators perform?" were constantly reviewed and updated on the basis of internal and external ESG research data. Compliance with the exclusion criteria was monitored both before an investment was made and during the subsequent holding period.

2) Engagement policy in the event of particularly severe negative impacts:

Greenhouse gas emissions

During the reporting period, no portfolio companies were identified by means of in-house analysis as having particularly severe negative impacts on greenhouse gas emissions. Accordingly, there was no exposure with any reference to particularly severe negative impacts during the reporting period.

To drive improvements in respect of **greenhouse gas emissions**, the sub-fund actively engaged with 4 portfolio companies that have not yet set themselves any climate targets. As at 31 December 2024: The discussions are still ongoing, in the event the engagement with these companies could not be concluded.

Social and employee matters

During the reporting period, no portfolio companies were identified by means of in house analysis as having particularly severe negative impacts on social and employee matters. Accordingly, there was no exposure with any reference to particularly severe negative impacts during the reporting period.

Flossbach von Storch also reports on activities performed as an active owner in the annual Active Ownership report, which is published on the website together with sustainability-related disclosures.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

How did this financial product perform compared to the reference benchmark?

Not applicable. Flossbach von Storch IV - Global Flexible promotes E/S characteristics but does not designate an index as a reference benchmark.

Independent Limited Assurance Report on the SFDR periodic reporting

To the Board of Directors of the Management Company of Flossbach von Storch IV

We have performed a limited assurance engagement with respect to the periodic reporting according to the Regulation (EU) 2019/2088 (SFDR) on sustainability-related disclosures in the financial sector (the "SFDR periodic reporting") of the sub-funds of Flossbach von Storch IV (the "Fund") as detailed in the Appendix 1 for the year ended 31 December 2024.

Criteria

The criteria used by Flossbach von Storch IV to prepare the SFDR periodic reporting is set out in the Appendix 2 (the "Criteria") which are based on the requirements from the Article 11 of SFDR as well as the requirements of the Article 6 of the Regulation (EU) 2020/852 on the establishment of a framework to facilitate sustainable investment (the "EU Taxonomy").

Responsibilities of the Board of Directors of the Management Company

The Board of Directors of the Management Company is responsible for the preparation of the SFDR periodic reporting in accordance with the Criteria, including the selection and consistent application of appropriate indicators and calculation methods as well as making assumptions and estimates, which are reasonable in the circumstances. This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation of the SFDR periodic reporting that is free from material misstatement, whether due to fraud or error.

Inherent limitations

The absence of a significant body of established practice on which to draw to evaluate and measure non-financial information allows for different, but acceptable, measures and measurement techniques and can affect comparability between entities. In addition, we do not provide any assurance over the source information that the Fund obtained directly from the investments or third-party experts.

Our Independence and Quality Management

We have complied with the independence and other ethical requirements of the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF), which is founded on fundamental principles of integrity, objectivity, professional competence and due care, confidentiality and professional behaviour.

Our firm applies International Standard on Quality Management 1, as adopted for Luxembourg by the CSSF, which requires the firm to design, implement and operate a system of quality management including policies or procedures regarding compliance with ethical requirements, professional standards and applicable legal and regulatory requirements.

Responsibility of the "Réviseur d'entreprises agréé"

Our responsibility is to express a limited assurance conclusion on the SFDR periodic reporting based on the procedures we have performed and the evidence we have obtained. We conducted our limited assurance engagement in accordance with the International Standard on Assurance Engagements (ISAE) 3000 (Revised) Assurance Engagements other than Audits or Reviews of Historical Financial Information, as adopted for Luxembourg by the "Institut des Réviseurs d'Entreprises". This Standard requires that we plan and perform our engagement to obtain limited assurance about whether the SFDR periodic reporting is free from material misstatement.

A limited assurance engagement involves assessing the suitability in the circumstances of the Fund's use of the Criteria as the basis for the preparation of the SFDR periodic reporting, assessing the risks of material misstatement of the SFDR periodic reporting whether due to fraud or error, responding to the assessed risks as necessary in the circumstances, and evaluating the overall presentation of the SFDR periodic reporting. A limited assurance engagement is substantially less in scope than a reasonable assurance engagement in relation to both the risk assessment procedures, including an understanding of internal control, and the procedures performed in response to the assessed risks.

Summary of work performed

The procedures we performed were based on our professional judgment and included inquiries, observation of processes performed, inspection of documents, analytical procedures, evaluating the appropriateness of quantification methods and reporting policies, and agreeing or reconciling with underlying records.

Given the circumstances of the engagement, in performing the procedures listed above, we:

- gained an understanding of the process of compilation of the SFDR periodic reporting;
- gained an understanding of the Criteria and its suitability for the evaluation of the SFDR periodic reporting;
- gained an understanding of the design and operation of the controls in place in relation to the preparation of the SFDR periodic reporting;
- evaluated the reasonableness of those estimates and judgements made by management in the preparation of the information included in the SFDR periodic reporting, that we considered relevant for the purpose of our limited assurance conclusion;
- performed substantive testing using sampling techniques on the information included in the SFDR periodic reporting, and assessing the related disclosures; and
- reconciled disclosures with the corresponding data in the audited financial statements, when applicable.

The procedures performed in a limited assurance engagement vary in nature and timing from, and are less in extent than for, a reasonable assurance engagement. Consequently, the level of assurance obtained in a limited assurance engagement is substantially lower than the assurance that would have been obtained had we performed a reasonable assurance engagement. Accordingly, we do not express a reasonable assurance opinion about whether the SFDR periodic reporting has been prepared, in all material respects, in accordance with the Criteria.

Limited Assurance Conclusion

Based on the procedures we have performed and evidence we have obtained, nothing has come to our attention that causes us to believe that the SFDR periodic reporting for the year ended 31 December 2024 has not been prepared, in all material respects, in accordance with the Criteria.

Purpose and Restriction on use

This report, including the opinion, has been prepared for and only for the Board of Directors of the Management Company and the Unitholders in accordance with the terms of our engagement letter and is not suitable for any other purpose. We do not accept any responsibility to any other party to whom it may be distributed.

Appendix 1 List of sub-funds and related SFDR classification

Sub-fund's name	SFDR classification
Flossbach von Storch IV – Global Flexible Bond	Article 8
Flossbach von Storch IV – Global Flexible	Article 8

General Criteria:

- Appropriate use of the Annex IV (for Article 8 products) and Annex V (for Article 9 products) of the Regulation 2022/1288 of 6 April 2022 supplementing Regulation (EU) 2019/2088 of the European Parliament and of the Council with regard to regulatory technical standards, as amended (the "RTS");
- Conformity of the client's Sustainable Finance Disclosure Regulation (SFDR) periodic reporting layout vis-à-vis the general principles for the presentation of information stated in the Article 2 of the RTS;
- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088, as amended (the "SFDR Regulation") Art. 11 to the disclosure made in the SFDR periodic reporting;
- All relevant sections of either the Annex IV or V of the RTS, and relevant requirements as defined in the RTS, have been included and responded to:
- Consistency of the qualitative statement of sustainable indicators with the evidence obtained for the numeric information on those indicators;
- Appropriate application of the formula according to the RTS in the following questions:
 - What were the top investments of this financial product?
 - What was the proportion of sustainability-related investments?
- Consistency of the information described in the financial information of the annual report with the SFDR Periodic reporting;
- When applicable, consistency of the information described in the SFDR Periodic reporting with the information disclosed in the pre-contractual documents (Prospectus "Investment policy section" & RTS Annex II-III).

Criteria where at least one Sub-Fund is an Article 8 product:

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 11 to the methodology related to the promotion of environmental or social characteristics (the "Methodology for E/S characteristics") described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);
- Appropriate design of the formulas with the Methodology for E/S characteristics (the "E/S Characteristics Formulas");
- Appropriate application of the E/S Characteristics Formulas.

Criteria where at least one Sub-Fund is having sustainable investments according to the Article 2(17) of the SFDR RTS and opt to report a 0% Taxonomy alignment:

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 2(17) to the methodology (the "Sustainable Investments Methodology") described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);
- Appropriate design of the formula with the Sustainable Investments Methodology (the "SFDR Sustainable Investments Formulas");
- Appropriate application of the SFDR Sustainable Investments Formulas.

Criteria where at least one Sub-Fund is having sustainable investments according to the Article 3 of the EU Taxonomy Regulation 2020/852 and not per SFDR Article 2(17):

- Appropriate application of the methodology outlined in EU Taxonomy Regulation 2020/852;
- Appropriate design of the formula with the EU Taxonomy Regulation 2020/852 (the "EU Taxonomy Formulas");
- Appropriate application of the EU Taxonomy Formulas.

Criteria where at least one Sub-Fund is having sustainable investments according to the Article 2(17) of the SFDR RTS and opt to report following the EU Taxonomy:

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 2(17) to the methodology (the "Sustainable Investments Methodology") described in the website disclosure according to SFDR Regulation 2019/2088 Art. 10.1(b);
- Appropriate design of the formula with the Sustainable Investments Methodology (the "SFDR Sustainable Investments Formulas");
- Appropriate application of the methodology outlined in EU Taxonomy Regulation 2020/852;
- Appropriate design of the formula with the EU Taxonomy Regulation 2020/852 (the "EU Taxonomy Formulas");
- Appropriate application of the SFDR Sustainable Investments Formulas and EU Taxonomy Formulas.

Criteria where at least one Sub-Fund is opting to report the Principal Adverse Impact:

- Appropriate design of the formulas with the elements outlined in the Annex I supplementing the EU Regulation 2019/2088 (the "PAI formulas");
- Appropriate application of the PAI formulas.

Criteria where at least one Sub-Fund has designated an index as a reference benchmark:

- Appropriate inclusion of the elements outlined in SFDR Regulation 2019/2088 Art. 11 1. (b) (ii) to the design of the formulas (the "Benchmark Formulas");
- Appropriate application of the Benchmark Formulas.
